MANUFACTURING, TRADING & EXPORT

Milieu of D.A.R Salt

Our Company aims towards achieving total customer satisfaction. We have the required industrial expertise that helps us to supply our products within the stipulated time frame, irrespective of the quantity ordered. We make sure that our Salts do not lack behind in any aspect, be it quality, purity or proper content. Therefore, we test them at each and every stage of processing and before packaging too. Our Salt has longer shelf life and to ensure that we pack it in moisture-less. Moreover, being a leading Industrial Salts Manufacturer in Thoothukudi, we are capable enough to meet the urgent and bulk requirements of the clients.

Our Products

We provide good quality of salts

We make sure that our Salts do not lack behind in any aspect, be it quality, purity or proper content. Therefore, we test them at each and every stage of processing and before packaging too.

Crystal Salt

Sodium chloride crystals are cubic in form. Table salt consists of tiny cubes tightly bound together through ionic bonding of the sodium and chloride ions. The salt crystal is often used as an example of crystalline structure. The size and shape of salt crystals can be modified by temperature.

Powder Salt

Flour salt, also called powdered salt, has been offered by salt suppliers to be utilized in food manufacturing for a long time. This unique type of salt is food grade sodium chloride or potassium chloride that has been pulverized to create the smallest and finest granulations of salt crystals. With this fine-powdered crystal size, it allows for increased solubility and blendability compared to standard granulated table salt.

Semi Powder Salt

Halite more commonly known as Rock salt is a mineral formed from sodium chloride. It's chemical formula is NaCl and this also includes other variations of salt such as common salt and table salt. Rock salt tends to be the industrial name used for Halite. It forms as isometric crystals and is typically colourless or white, but may also be other colours depending on the amount and type of impurities contained within it.

Milestone Achievement

At D.A.R Salt, we take immense pride in our journey marked by significant milestones. With unwavering dedication and a commitment to quality, we have emerged as a trusted name in the industry, providing exceptional industrial salts to our esteemed clients.
